About WOFI

WOFI Kenya (trading as **WOFI IT SOLUTIONS**) is a registered Kenyan software development company specializing in custom enterprise solutions for businesses across Kenya. Registered under Business Number **BN-DLSKZ2VL**, we have been transforming how organizations manage their information and operations through innovative, reliable software systems since 2017.

Operating from Nova Gardens on Usiu Street in Nairobi's Kasarani district, we serve clients across multiple sectors including education, real estate, retail, insurance, logistics, and general business management.

Our mission is simple: **We Organize & File Information**. We build software that brings order to chaos, automates manual processes, and empowers businesses to scale efficiently. From school management systems to property platforms, POS solutions to document management—we create systems that just work.

What Sets Us Apart

■■ Built to Last

Our systems run reliably for years with 99% uptime.

■ Problem-Solving Innovation

We add fraud detection, automation, and real-time alerts that matter.

■■ Local Expertise

Deep understanding of Kenyan business realities, M-Pesa, and SMS patterns.

■ Clean Architecture

DDD principles, SOLID patterns, secure PHP, RESTful APIs.

■ ROI-Focused

Our solutions directly reduce costs, prevent losses, and improve efficiency.

- Automated Backups

- Continuous Deployment

Our Impact

Metric	Achievement
Years of Experience	7+ Years
Systems Deployed	50+ Systems
System Uptime	99%
Client Satisfaction	100%

Client Testimonials

"The fraud detection system WOFI built saved us thousands. We discovered internal theft we never would have caught otherwise."

— Wine & Spirit Shop Owner, Nairobi

"Before WOFI's system, we were losing documents and missing renewals. Now everything is digital with automatic alerts. Zero lost documents in 3 years."

— Insurance Agency Manager, Mombasa

"Our fee management went from chaotic spreadsheets to a professional system. The automated SMS and receipts save us hours daily."

— School Administrator, Kisumu

Our Development Process

1. Discovery & Analysis

We thoroughly understand your business processes, pain points, and goals. We map workflows and identify automation opportunities.

2. Solution Design

Custom system architecture designed for your needs. We create wireframes, database schemas, and technical specifications.

3. Iterative Development

Agile development with regular demos. You see progress and provide feedback throughout the build process.

4. Testing & Quality

Comprehensive testing across devices and scenarios. We ensure security, performance, and reliability.

5. Deployment & Training

Smooth launch with user training and documentation. We ensure your team is confident using the system.

6. Support & Evolution

Ongoing maintenance and feature additions. We grow with your business needs.
